

# Analysis and Risk Assessment Snapshot

Date:

Phase:

Name:

Age:

Cultural Considerations:

## Pattern and severity of harm

Consider: harm and its cumulative effect; current risks and concerns; parenting history in relation to siblings.

## Strengths and Protective Factors

What are the current protective factors?

What are the strengths within the family that increases the potential for safety?

## Rationale for Decision/s

What is the best thing to do now? Why?

Stability

Development

Safety

## Likelihood

Consider the changing family dynamics and other complicating factors.

Can the parent/caregiver prioritise the child's needs and safety? What are the constraints?

What is the likelihood of the child suffering significant harm in the future if nothing changes?

## Vulnerability

Consider the child's: development, temperament, behaviours, medical conditions, special needs and parental beliefs about the child.
